February 16, 2021

Ms. Joy A. Ricciuto, C.G.A.  
Town Accountant  
Town of Medfield  
459 Main Street  
Medfield, MA 02052

Dear Ms. Ricciuto:

For the purpose of satisfying the requirements of the Government Accounting Standards Board (GASB) **Statements No. 74 and No. 75**, Stone Consulting, Inc. has prepared a set of illustrative tables and other Required Supplementary Information (RSI) based on the January 1, 2019 actuarial valuation of the Town of Medfield Other Post-employment Benefits (OPEB) plan performed by Stone Consulting, Inc. The valuation and this report were prepared using generally accepted actuarial principles and practices and meet the parameters set by the Governmental Accounting Standards Board (GASB).

For GASB 74, the results are as of a valuation date of January 1, 2019, and an OPEB plan fiscal year-end of June 30, 2020. For GASB 75, the results are as of a valuation date of January 1, 2019, a measurement date of June 30, 2020, and a reporting date of June 30, 2020. To the best of our knowledge, this report is complete and accurate, and the assumptions used represent our best estimate of anticipated experience of the system unless required by statute or by the GASB standard.

We are pleased to present these exhibits. If the Town of Medfield or the Town of Medfield OPEB Trust has any questions on the content of this report, we would be glad to respond. Please note that this report is meant to be used in its entirety. Use of excerpts of this report may result in a misleading or inaccurate understanding of the results.

Stone Consulting, Inc. is completely independent of the Town of Medfield or the Town of Medfield OPEB Trust, including any of their officers and key personnel. Neither we or anyone else closely associated with us has any relationship with the Town of Medfield or the Town of Medfield OPEB Trust which would impair our independence, other than this or related assignments.

The undersigned are consultants for Stone Consulting, Inc. and members of the American Academy of Actuaries and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein.

Respectfully submitted,  
STONE CONSULTING, INC.

## SECTION I – ACTUARIAL RESULTS

### Summary of Results

The most recent actuarial OPEB valuation performed by Stone Consulting for the Town of Medfield was on January 1, 2019. Participant census data as of January 1, 2019 was supplied by the Town of Medfield and liabilities were first determined as of that date. Update procedures were used to roll the Total OPEB Liability from the valuation date to June 30, 2020, the OPEB plan's fiscal year-end (GASB 74) and the measurement date (GASB 75).

The key results as of June 30, 2020 were:

Total OPEB Liability	\$ 36,664,212
Plan Fiduciary Net Position	<hr/> 3,972,467
Net OPEB Liability	\$ 32,691,745

- “Total OPEB Liability” is the total liability for all benefits as of the reporting date and is based on a projection of future liabilities based on Town of Medfield’s actuarial assumptions.
- “Plan Fiduciary Net Position” is the amount of assets available and in the OPEB trust as of the end of the 2020 Fiscal Year, 06/30/2020.
- “Net OPEB Liability” is the difference between the above two figures and is the amount of the future liability not funded as of the reporting date.

These amounts are calculated by using what is referred to as the “Entry Age Normal” actuarial cost method, which is the method required by GASB. Note, also, that these figures are intended for financial reporting and are not intended to be used to determine funding of the OPEB plan.

### Normal Cost

Normal Cost for Plan Year 2020	\$ 1,467,327
--------------------------------	--------------

“Normal” or “Service” Cost is the cost of benefits accruing in each year. This figure is based on an interest rate of 5.94% and the Entry Age Normal Cost Method. Because the Normal Cost used for Plan Year 2020 is a beginning-of-year number, it is calculated using the discount rate, assumptions, and participant data used in the prior GASB 74/75 report. Changes due to assumptions and experience are then calculated at the end of the measurement period.

### Discount Rate at June 30, 2020

Results at June 30, 2020 use a discount rate of 7.25%. The 7.25% is based on an assessment of the Town of Medfield's investment strategy and should be thought of as the expected net long-term rate of return on the Town of Medfield's invested assets. The rate is determined based on a projection of future cash flows and assumes that the Town of Medfield makes additional cash contributions of \$425,000 per year increasing by 10% per year into the future (as described in its financial policy statement). Should the future contribution amount schedule change or the target asset allocation change, the valuation discount rate would likely change.

### Funding

Valuations performed for GASB74/75 purposes are not intended to be funding valuations. Rather, they are intended for use by accountants in developing financial statements. The rules set forth by GASB are designed to ensure that all entities report on a comparable basis. Development of a funding schedule requires additional assumptions and a separate actuarial valuation. Should an entity such as the Town of Medfield wish to develop a plan to fund its liability on an actuarial basis in total or in part, it is free to choose:

- The actuarial cost method used in determining the liability
- The length and amortization of the funding schedule, including establishment of various bases
- Actuarial assumptions, such as the discount rate (this rate would not need to tie into a cash flow analysis such as in Statements 74 and 75)

In general, the funding amount is an amount to cover the Normal Cost for the year plus an amount to amortize the unfunded liability over a period of time using a particular pattern (level, increasing, etc.). This would be done at a discount rate closer to the expected net long-term rate of return of 7.25% .

Use of a different cost method, discount rate, or other assumptions would give a different number for the Normal Cost, the unfunded OPEB Liability, and amortization amount.

The Town of Medfield has not asked Stone Consulting to prepare a funding schedule.

**GASB Statement No. 74 – Net OPEB Liability**

The components of the Net OPEB Liability for the Town of Medfield as of an OPEB plan fiscal year-end of June 30, 2020 were as follows:

	FY 2020	FY 2019
<b>Total OPEB Liability</b>		
Service Cost	\$ 1,467,327	\$ 1,573,811

\*Employer contribution of \$1,385,050 of Pay-As-You-Go and a \$425,000 cash contribution for FY2020.

Update procedures were used to roll the Total OPEB Liability from the valuation date (01/01/2019) to the beginning of the plan's fiscal year (07/01/2019) and to the OPEB plan's fiscal year-end (06/30/2020). [GASB Statement No. 74, Paragraph 35(c)]

Note: Charts in this report may not total due to rounding.

### Changes from Prior Report+

The discount rate was changed from 5.94% to 7.25%. This was the result of Medfield stating that it plans to increase its current contribution of \$425,000 by 10% per year into the future. As a result, the Town is fully funded. This resulted in a decrease of \$2,995,896 in the TOL.

Also, for 2020, we eliminated the so-called "Cadillac Tax" that was part of the Patient Protection and Affordable Coverage Act (PPACA). This tax was repealed by Congress. This resulted in a decrease in the TOL of \$1,706,191.

### Distribution of the Member Population

Town of Medfield OPEB Trust – Membership as of June 30, 2020

	2020	2019
Retired, Disabled, Survivors and Beneficiaries receiving benefits	253	229
Inactive plan members entitled to but not yet receiving benefit payments *	5	4
Active plan members	513	522
<b>Total</b>	<b>817</b>	<b>755</b>

These numbers are based on the data supplied by the Town of Medfield as of June 30, 2020. Note that these membership numbers count a retiree and a spouse as only one member, even if they have separate policies.

\* The number of inactive plan members was not available from the MTRS as of June 30, 2020. The inactive count shown here represents inactives for the Town of Medfield only. MTRS inactive data is unavailable, but we believe it is immaterial.

## Development of Exhibits

### DISCOUNT RATE

Total OPEB Liability as of the plan's fiscal year-end (June 30, 2020) is calculated using a discount rate assumption of 7.25%. To calculate this rate, Stone Consulting has conducted a cash flow study of the Trust assets and liabilities. Using a rate consistent with the Town of Medfield's investment strategy (7.25%), we determine the length of time for which the assets would support OPEB benefit payments for current and projected new employees. For the Town of Medfield, there is no depletion point. The present value of OPEB benefits is then calculated using a rate consistent with the Town of Medfield's investment strategy (7.25%) before the depletion point and a rate based on 20-year Municipal General Obligation bonds as shown in the Bond Buyer 20 Bond Index (2.21% as of June, 2020) after the depletion point. Finally, a single rate producing an equivalent present value of benefits is calculated. This is the 7.25% rate we have used for the Town of Medfield. One of the objectives of the provisions introduced by GASB 74 and 75 is to examine how benefit payments and plan contributions and investment earnings interact on a cash flow basis. GASB 74 and 75 require that these amounts be calculated with the Fair Value of Assets and using the Entry Age Normal cost method.

Projected contributions for each year are the sum of cash payments and the pay-as-you-go funding of the retirees. Consistent with the requirements of GASB Statement No. 74 and 75, we have first assigned the contribution to the cost of projected new entrants prior to allocating the remainder to cover existing actives and inactive employees.

The long-term rate of return which was used to develop the discount rate of 7.25% includes the effect of inflation (not subtracted out as in the real rates of return). It is based on a combination of expected rates of return on the mix of current and expected investments over a long-term period. These expectations are based on current market conditions, historical experience and future expectations. It assumes a rebalancing of assets on an ongoing basis as well as a constant monitoring of asset allocation and manager performance.

GASB Statement No. 74, Paragraph 34(b)(3) requires that an annual money-weighted rate of return be developed using the market value of assets at the beginning of the Plan Year, along with monthly cash flows. This has been done for the 2020 Fiscal year, and is shown below:

Fiscal Year	2020
Money-Weighted Rate of Return	1.99%

For detailed calculations of this amount, see the schedule on page 10.

### Discount Sensitivity

The following presents Town of Medfield's Net OPEB Liability calculated at the valuation discount rate of 7.25%, as well as at discount rates one percent higher (8.25%) and one percent lower (6.25%).

OPEB Plan Fiscal Year-End	1% Decrease (6.25%)	Current Discount Rate (7.25%)	1% Increase (8.25%)
06/30/2020	\$ 37,272,791	\$ 32,691,745	\$ 28,880,297

### Sensitivity of Current Valuation to Funding Level

To give Town of Medfield some idea of the sensitivity of the discount rate employed in the GASB valuation to the assumed funding level, Stone Consulting has performed depletion analysis under an alternative funding scenario. If the Town of Medfield were to cease making contributions to the OPEB trust, the discount rate employed would be lowered by 464 basis points from 7.25% to 2.61%. Lower returns than 7.25% per annum will increase the number of years the Town of Medfield needs to contribute in order to use the fully funded discount rate for GASB 74 and 75. We have not calculated liabilities at the 2.61% rate; however, as required by GASB 74 and shown on page 6 of this report, a 6.25% discount rate increases the Net OPEB Liability from \$32,691,745 to \$37,272,791.

These sensitivity calculations assume the same assumptions and methods as used in the original valuation with only a change in the amount the Town of Medfield plans to contribute. They also assume no change in the Town of Medfield investment strategy. A change in such strategy would also impact the discount rate determined.

### Trend Sensitivity

For postretirement medical plans in particular, the calculated actuarial values are highly sensitive to the assumed rate of health care cost trend. This is due to the compounding effect of the annual trend rates assumed for medical costs, as opposed to pension valuations where benefit levels typically remain fixed.

The following table illustrates the effect on our valuation results of a 1% increase or decrease in the assumed rates of health care cost trend in each year.

OPEB Plan Fiscal Year-End	1% Decrease	Base Trend *	1% Increase
06/30/2020	\$ 27,927,816	\$ 32,691,745	\$ 38,595,942

\* Base trend rates are found in Actuarial Assumptions and Methods, page 28.

### Long-Term Expected Real Rate of Return

The long-term expected real rate of return reflects the expected rate of return on plan assets adjusted for the expected rate of inflation. Note that the discount rate includes the effect of inflation. The long-term real rate of return removes the effect of inflation on the return amounts. It is a long-term assumption and is meant to reflect a best estimate of future experience, based on the expected asset allocation. The allocation percentages are based on information provided by the Town of Medfield and the Massachusetts Pension Reserves Investment trust (PRIT) asset consultant, NEPC. The real rates of return below are based on 30-year return estimates provided by NEPC through the Pension Reserve Investment Trust, adjusted using NEPC's 2.5% inflation assumption.

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return (Geometric)
Global Equity	39%	4.9%
Core Fixed Income	15%	0.5%
Value-Added Fixed Income	8%	4.2%
Private Equity	13%	8.0%
Real Estate	10%	3.4%
Timberland	4%	4.1%
Portfolio Completion (PCS)	11%	3.2%

Town of Medfield's plan to fund OPEB is to contribute \$400,000 per year to the OPEB Trust.

There is no requirement that an actuarially determined contribution (ADC) be calculated. There is no statutory ADC, and the Town of Medfield is currently not funding the OPEB liability on an actuarial basis. Therefore, Stone Consulting, Inc. has not calculated an ADC for Fiscal 2020.

## Projection of the Net OPEB Liability

### TOTAL OPEB LIABILITY (TOL)

The Total OPEB Liability at the beginning of the measurement period (07/01/2019) is equal to the Total OPEB Liability (TOL) rolled from 01/01/2019. Any differences between the projected amount and the actual value that are not the result of changes in assumptions or plan provisions are recognized as “Differences between expected and actual experience.” GASB Statement No. 75, Paragraph 42 requires that the TOL be calculated under the Entry Age Normal Cost Method. The components of the TOL (calculated as of 01/01/2019 at a discount rate of 7.25%) are as follows:

Actives	\$ 16,858,946
Retirees, Disabled, Beneficiaries, and Vested Terminated	16,666,726
Total	\$ 33,525,672

The TOL is projected to the end of the measurement period (06/30/2020) by adding the changes resulting from experience, assumption changes, and changes to plan provisions. Interest is given to the TOL, Service Cost, and paid benefits, and added to the total, less the projected benefit payments for the year. Changes due to expected and actual gains on plan assets will be recognized over a five-year period [GASB Statement No. 75, Paragraph 43b], and liabilities arising from changes in plan structure or assumptions will be spread over the average of the expected remaining service lives of all employees that are provided with OPEB through the OPEB plan (active employees and inactive employees) [GASB Statement No. 75, Paragraph 43a]. Changes in plan provisions are recognized immediately.

### PLAN FIDUCIARY NET POSITION (FNP)

GASB Statement No. 75 requires that the Fair Value of Assets be used for the Fiduciary Net Position. We have used the Market Value of Assets, adjusted for payables and receivables. Net investment income is the portion of the change in assets during the measurement period that is not attributed to employee/employer contributions, benefits payments, administrative expense, or other changes.

The projected Net OPEB Liability (NOL) for the end of the year is the portion of the TOL not covered by the FNP.

## CHANGES IN METHODS, ASSUMPTIONS, AND PLAN PROVISIONS

The discount rate was changed from 5.94% to 7.25%. This was the result of the following:

- 1) The change in the assumed rate of return on Medfield OPEB Trust assets from 7.50% to 7.25%. This change reflects the much lower prevailing rates of return on fixed income assets that currently prevails.
- 2) The change in the municipal bond discount rate from 3.50% to 2.21%.
- 3) A change in funding policy. Annual contributions are now assumed to increase by 10% per year.

The "Cadillac Tax" provision of the Patient Protection and Affordable Care Act (PPACA) was eliminated. Therefore, we did not include such an amount in the liability calculation.

NOTES

A. See the RSI schedule of changes to the Net OPEB Liability, on page 11.

B. Events that impact the Total OPEB Liability are assumed to happen evenly throughout the period. In addition, the amount of interest is calculated using an interest rate equal to the discount rate that was used to determine the service cost. The amount is determined as follows:

Description	Amount for Period (a)	Portion of Period (b)	Interest Rate (c)	Interest on the Total OPEB Liability (a) x (b) x (c)
Beginning Total OPEB Liability	\$ 38,925,805	100%	5.94%	\$ 2,312,193
Service cost	1,467,327	100%	5.94%	87,159
Benefit payments	\$ (1,385,050)	50%	5.94%	(41,136)
Interest				\$ 2,358,216

C. Differences between expected and actual experience recognized in the current period in accordance with paragraph 43a of Statement 75. For the detailed calculation of this amount, see the schedule on page 16.

D. Assumption and plan provision changes recognized in OPEB Expense in the current period in accordance with paragraph 43a of Statement 75. For detailed calculations of these amounts, see the schedule on page 16.

E. Changes in the amounts invested are assumed to occur evenly throughout the period. In addition, the amount of projected earnings on plan investments is calculated using the assumed rate of return on plan investments as of the beginning of the period. The amount is determined as follows:

Description	Amount for Period (a)	Portion of Period (b)	Projected Rate of Return (c)	Projected Earnings (a) x (b) x (c)
Beginning plan Fiduciary Net Position	\$ 3,470,967	100%	5.94%	\$ 206,175
Employer contributions	1,810,050	50%	5.94%	53,758
Employee contributions	0	50%	5.94%	0
Benefit payments	(1,385,050)	50%	5.94%	(41,136)
Administrative expense	0	50%	5.94%	0
Total projected earnings				\$ 218,798
Actual earnings				76,500
Difference between projected and actual earnings				\$ 142,298

Differences between projected and actual earnings recognized in the current period in accordance with paragraph 43b of Statement 75. For detailed calculation of this amount, see the schedule on page 16.

### SECTION III – APPENDICES

Actuarial methods and assumptions were selected by the Town of Medfield, other than those required by statute or by GASB statements, with guidance from Stone Consulting, Inc.

#### Actuarial Methods

##### Actuarial Cost Method

Costs are attributed between past and future service using the Entry Age Normal cost method. For attribution purposes, benefits are assumed to accrue over all employee service until decrement.

##### Asset Valuation Method

Market value of assets with payables and receivables.

#### Actuarial Assumptions

##### Valuation Date

January 1, 2019

##### Interest Rate / Discount Rate

- 7.25% per year net of investment expenses as of 06/30/2020. In the calculation of the discount rate, the 20-year Municipal General Obligation bonds as shown in the Bond Buyer 20 Bond Index (2.21%) was used.
- 5.94% per year as of 07/01/2019.

##### Mortality

- **Actives:** The RP-2014 Mortality Tables adjusted to 2006, sex-distinct, for Employees projected using generational mortality and scale MP-2016.
- **Retirees:** The RP-2014 Mortality Tables adjusted to 2006, sex-distinct, for Healthy Annuitants projected using generational mortality and scale MP-2016.
- **Disabled:** The RP-2014 Mortality Tables adjusted to 2006, sex-distinct, for Healthy Annuitants projected using generational mortality and scale MP-2016. Set forward 2 years.

No additional mortality projection is assumed other than as described above.

### Actuarial Assumptions (Continued)

#### Salary Scale

- Groups 1, 2, 4 – increases by years of service 5.50%, 5.50%, 5.00%, 4.50%, 4.50%, 4.00%, 3.50%

14	4.35%
15-16	4.20%
17-19	4.10%
20+	4.00%

Overall payroll increase rate of 3.00% per year. 3.80% was used in the prior valuation.

#### Inflation

- CPI-U of 2.50% per year.

### Actuarial Assumptions (Continued)

#### Eligibility for Vested Post-Retirement Medical Benefits upon Withdrawal

10 years of Service; assumed that individuals who withdraw prior to age 40 will elect a return of pension contributions and therefore be ineligible for retiree medical coverage.

#### Withdrawal Prior to Retirement, Non-Teachers

### Actuarial Assumptions (Continued)

#### Participation Rates

Current retirees and spouses are assumed to continue the same coverage they have as of the valuation date. No future election of coverage is assumed for those retirees and spouses who currently have not elected coverage.

Medical All Retirees: 67.5% of the active Town of Medfield employees eligible for post-employment medical benefits are assumed to elect Medical Coverage immediately upon retirement.

Life All Retirees: 60% of active Town of Medfield employees eligible for post-employment medical benefits are assumed to elect Life Insurance coverage immediately upon retirement.

For all Retirees: For the Town of Medfield plans 60% of spouses are assumed to participate.

Participants with no or unknown current coverage (e.g. active employees who do not currently participate in Town of Medfield's medical plans) are assumed to elect retiree coverage at the same rates as currently covered active employees. Medicare-eligible retirees currently under age 65 are assumed to elect a Medicare plan option at age 65.

#### PPACA

OPEB liabilities as of June 30, 2020 no longer include an estimate of the impact from the Patient Protection and Affordable Care Act (PPACA), including the so-called "Cadillac Tax" on high-cost health plans, as it has been repealed as of the measurement date. The Cadillac Tax on plans whose richness exceeds set levels was to begin in 2022.
