

School Building Committee
Meeting Packet
April 3, 2024

April __, 2024

Dear _____,

We on the Medfield School Building Committee (SBC) are writing this letter to bring you up to speed on where the project to replace the Dale Street School stands, and to give very preliminary order of magnitude cost estimates of this project. We are doing this in considerable part because the costs are likely to be quite high, and we do not want the ultimate cost of this project to come as a shock to our citizens.

As you know, Medfield constructed the original Dale Street School during the 1940's. {By any chance, do we know the cost of this construction back then? This might be an interesting fact to throw in here.} The building is well past its useful life, and it should either be replaced or subject to a very substantial addition/renovation (add/reno) process. [WE could think about adding in detail here about its poor condition, but I left that out in the interest of brevity.]

The reality which we are facing is that the cost of this project is going to be high. At this point, we certainly do not know precise figures. There are many variables: interest rates at the time the Town seeks a bond to finance this construction; the cost of project materials and other costs associated with the project; the cost of modular units if an add/reno option at the current Dale Street location is used; and others.

However, we have been trying to generate a cost estimate using at least two variables: the cost if the Town is accepted into the Massachusetts School Building Authority (MSBA) program, and an estimate of the cost if it is not accepted into this program. As most of you know, each year, the MSBA selects a number of schools to receive state funds to offset some of the cost of building a new school. In 2021, when the Town voted down a project for a new school at the current Wheelock campus, the MSBA had approved the Town's application, and Medfield could look forward, at that time, to approximately \$19 million in state MSBA funds to help defray the cost of the project.

In 2023, the Town reapplied to the MSBA Program, and in December 2023, the MSBA did not invite Medfield back into the MSBA Program. The Town, through the Select Board and School Committee is again reapplying to the MSBA Program, [Is Select Board involved?] and we will learn in December 2024, whether the MSBA will invite Medfield into the MSBA Program. If the MSBA does invite us into the MSBA Program, we estimate, though we do not know for certain, that the amount of MSBA state reimbursement could be, approximately \$23 million in financial support.

In 2021, Medfield estimated that the total project cost of a new school with a 575 enrollment would be roughly \$83 million, (Medfield's share after MSBA reimbursement was approximately \$63 million). [PLEASE, PLEASE, somebody check and verify these figures!!] In just a few short years, construction costs have risen substantially, both for materiel and labor and borrowing costs have risen due to higher interest rates.

Thus, the SBC is now very preliminarily planning for an elementary school with an enrollment of 475 to 500 students. (The SBC is in the process of working with a demographer to get a better handle on projected enrollment in Medfield Public Schools in coming decades, and this may impact planning on the projected size of the school.)

Commented [c1]: Don't know cost of original building in 1940, but it has gone through updates and the addition of space since then with modulars and cafeteria.

Deleted: for
Deleted: funding
Deleted: declined to provide funds to Medfield.
Commented [c2]: The School Committee has already voted to submit a Statement of Interest and the Select Board will discuss at their April 2nd meeting. Assuming the Select Board approves, then statement is accurate.
Deleted: this year pursuing state funding,
Deleted: provide this financial support.
Deleted: approve funding
Deleted: think
Deleted: would provide
Deleted: 67
Deleted: .
Deleted: This school was designed for over 550 students

If the Town does get invited into the MSBA Program in the next, December 2024, planning cycle, the SBC estimates that Medfield will have to borrow approximately \$71 million to build a new school. If the Town does not get invited into the MSBA Program in the next, December 2024, planning cycle, the SBC estimates that Medfield will have to borrow approximately \$96 million.

Those are large figures. Assuming that interest rates at the time Medfield goes out to borrow funds are in the range of 3.5%-4.5%, the SBC estimates that the average increase in property taxes on a home with a valuation of \$902,000, will be \$983 per year (with MSBA funding), and \$1,341 per year (without MSBA funding). [Query: should we include that this means approximately \$250 per quarterly tax bill at lower figure, and \$340 per quarter at higher figure. I favor leaving it out, but I thought I'd ask the question.]

Some of you may be wondering: would an add/reno option cost less than new construction? While this question will need more study, the current answer is that we do not know for certain, and given the relatively poor condition of Dale Street School at present, we do not think that this will make a substantial difference in the cost of the project. Of course, we would like to be wrong about this and to have the cost of an add/reno option come in lower, but we do not know that at this time.

We know that these figures are sobering. The SBC is planning to conduct a number of meetings with Town residents, in the hope of receiving feedback and questions from you related to cost and other matters. The first of these meetings is scheduled for May ___, 2024, in the High School Auditorium at ___ p.m. We hope to see you there.

Sincerely,

MEDFIELD SCHOOL BUILDING COMMITTEE
[I would suggest putting our names below,

but that is something to discuss.]

PLAN TO EMPOWER

FINAL REPORT

Medfield Public Schools
Enrollment Projection Study
April 4, 2024

Medfield Public Schools

INTRODUCTION

FutureThink was contracted to develop enrollment projections for the Medfield Public Schools.

This report contains ten-year enrollment projections, which were developed for the Medfield Public Schools by analyzing the following data:

- ▶ Live birth data
- ▶ Historical enrollment
- ▶ Homeschool enrollment
- ▶ Community demographics
- ▶ Housing information

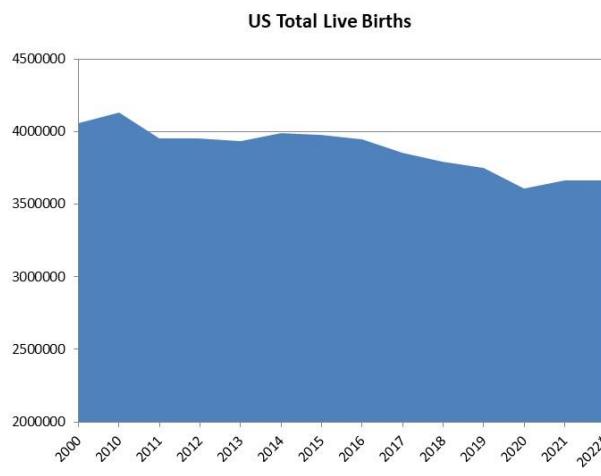

The projections presented in this report are meant to serve as a planning tool for the future and represent the most likely direction of the District.

FutureThink

NATIONAL & MASSACHUSETTS TRENDS IN ENROLLMENT

The United States as a whole continues to undergo major shifts in public student enrollment. Births are a significant part of this shift. From 2000 to 2010, births increased then declined until 2014 when there was a slight uptick. Since 2014, there has been steady decline reaching an all-time low in 2020. The decrease from 2019 to 2020 was approximately 4 percent. However, in 2021, there was a slight uptick of 1.5 percent. Births dropped slightly from 2021 to 2022.

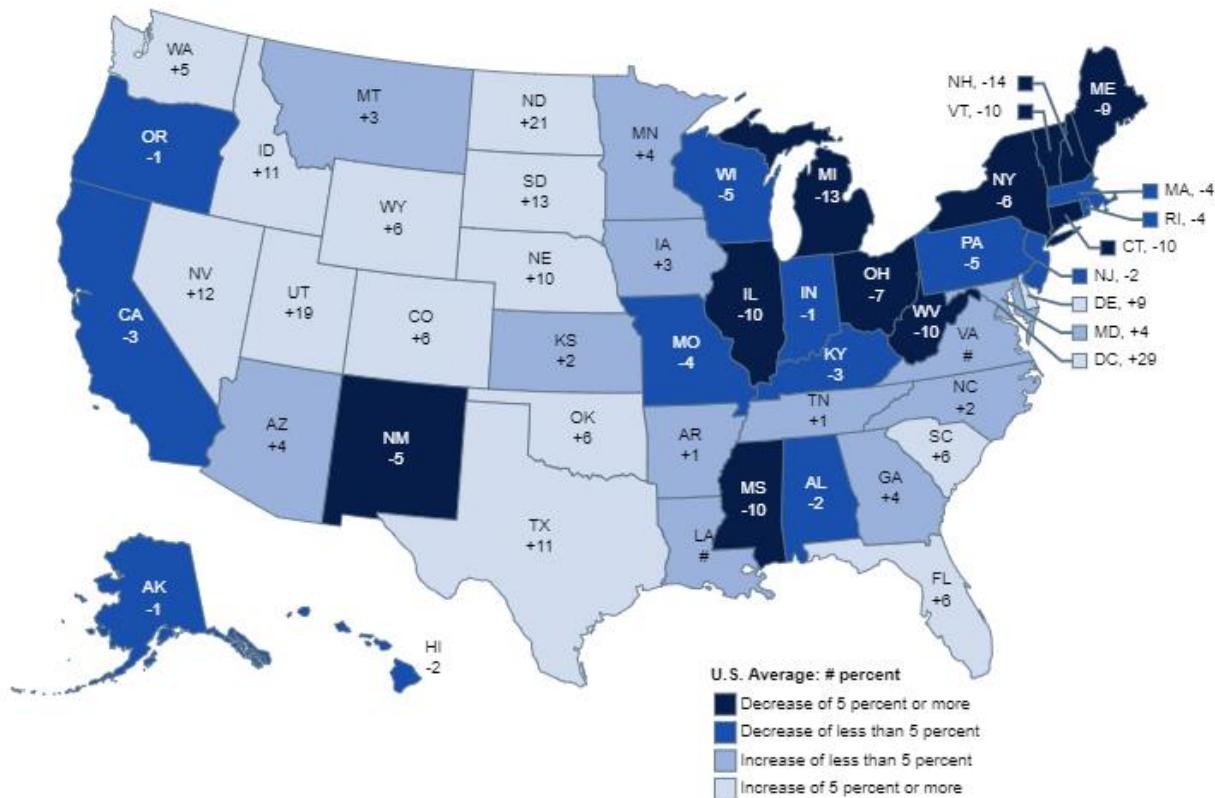

Source: CDC, NVSS, National Vital Statistics Reports, Report No. 28, June 2023

From the 2019-20 to the 2020-21 school year, total public school enrollment in Pre-K - 12 dropped from 50.8 million to 49.4 million students. From 2009-10 to the 2019-20 school year, however, enrollment had increased overall by 1.4 million.

Medfield Public Schools

The figure below illustrates the change in Pre-K - 12 public school enrollment from the 2009-10 to the 2020-21 school year. States with growth in enrollment were primarily in the southeast and west. Massachusetts experienced a decrease of 4 percent.

Figure 2. Percentage change in public elementary and secondary school enrollment, categorized into specific ranges, by state: Fall 2009 to fall 2020

Rounds to zero.

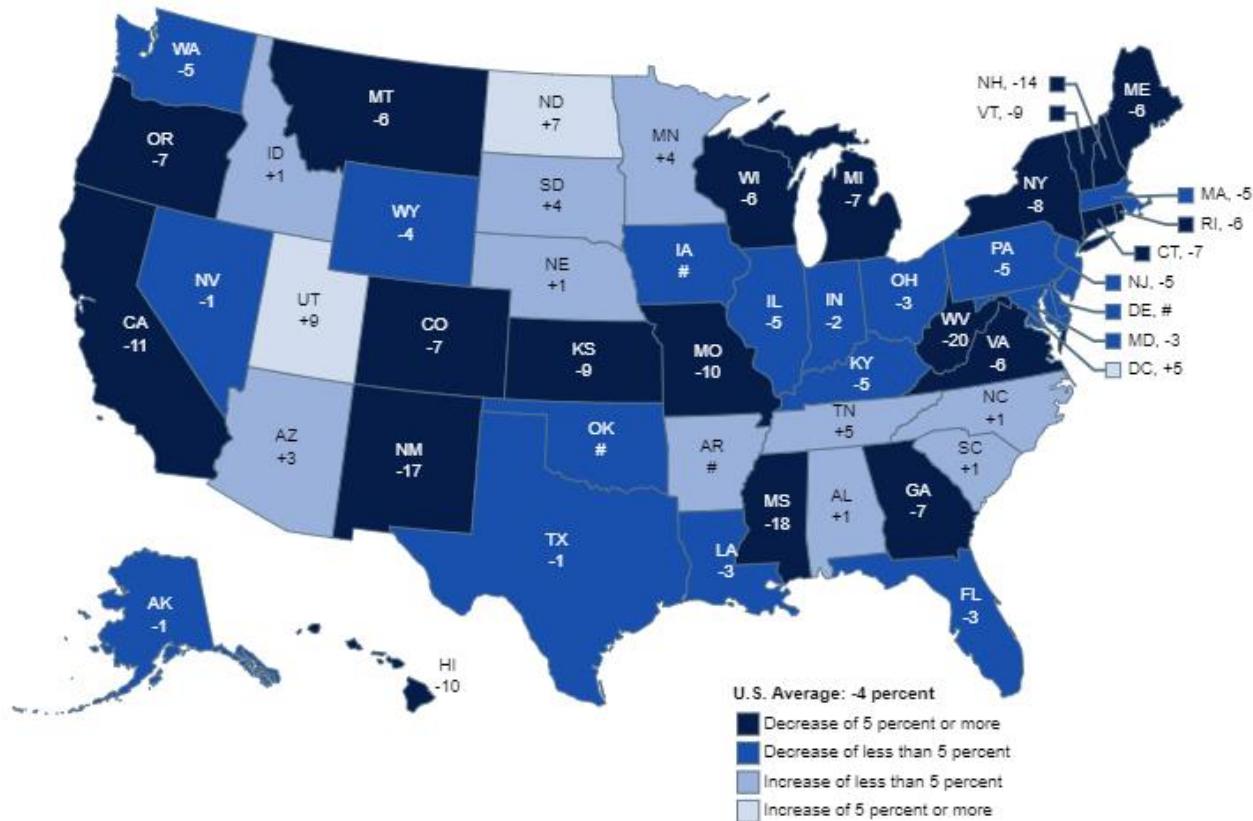

NOTE: U.S. average is for the 50 states and the District of Columbia. Data include both traditional public schools and public charter schools. Includes imputations for nonreported prekindergarten enrollment in California and Oregon for fall 2020. Includes imputations for nonreported enrollment for all grades in Illinois for fall 2020. Categorizations are based on unrounded percentages.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 2009-10 and 2020-21 Preliminary. See *Digest of Education Statistics 2021*, table 203.20.

Medfield Public Schools

The figure below illustrates the projected change in Pre-K-12 public school enrollment from the 2020-21 to the 2030-31 school year. Growth is expected to continue primarily in parts of the southeast and upper midwest. Massachusetts is projected to experience a decrease of 5 percent.

Figure 3. Projected percentage change in public elementary and secondary school enrollment, categorized into specific ranges, by state: Fall 2020 to fall 2030

Rounds to zero.

NOTE: U.S. average is for the 50 states and the District of Columbia. Data include both traditional public schools and public charter schools. Includes imputations for nonreported prekindergarten enrollment in California and Oregon for fall 2020. Includes imputations for nonreported enrollment for all grades in Illinois for fall 2020. Projections in this figure were calculated after the onset of the coronavirus pandemic and take into account the expected impacts of the pandemic. Categorizations are based on unrounded percentages.

See *Digest of Education Statistics 2021*, table 203.20.

Medfield Public Schools

HISTORICAL ENROLLMENT

Over the past ten years, student enrollment in the Medfield Public Schools has decreased by 157 students in grades Pre-K – 12. However, enrollment has increased by 82 students at the early elementary school level. Total enrollment for the 2023-24 school year is 2,498 students.

The following tables and graph illustrate the District's Pre-K – 12 enrollment history from 2014-15 through 2023-24.

LIVE BIRTH DATA

Utilization of live birth data is recommended when projecting future kindergarten enrollments as it provides a helpful overall trend. The live birth counts are used in determining a birth-to-kindergarten survival ratio. This ratio identifies the percentage of children born in a representative area who attend kindergarten in the District five years later. The survival ratios for birth-to-kindergarten as well as grades 1-12 can be found later in this report.

The Massachusetts Department of Health provides information about live birth events for Massachusetts residents. Information about events occurring outside of Massachusetts to Massachusetts residents is included. Information about events occurring inside Massachusetts to Massachusetts residents is not included.

Data is arranged by the residence of the mother.

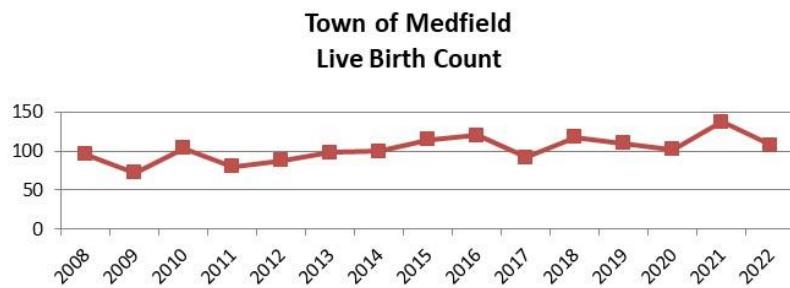

Live birth counts are different from live birth rates. The live birth count is the actual number of live births. A birth rate is the number of births per 1,000 women in a specified population group. Birth rates are provided for counties only and for 9 age groups from 10-14 years to 45+ years.

The following table and graph include the live birth count for the Town of Medfield.

Town of Medfield
Live Birth Count
2008-2022

Year	Total

DEMOCRAPHICS

General demographic data is included in the following tables for Norfolk County and Medfield.

General Demographic Information

	Norfolk County	State of MA
Per Capita Income	\$66,166	\$54,025
Median Household Income	\$115,969	\$94,488
Persons Below Poverty	6.5%	10.4%

Source: US Census, American Community Survey, 2022 5-Year Estimates

Total Population

	2010 Census	2020 Census
Norfolk County	670,850	725,981
Medfield CDP	6,483	6,939

Source: 2010 Census: DEC Summary File 2; 2020 Decennial Census

Also included are block group estimates and projections provided by ESRI. ESRI uses a time series of estimates from the U.S. Census Bureau that includes the latest estimates and inter-censal estimates adjusted for error of closure. The Census Bureau's time series is consistent, but testing has revealed improved accuracy by using a variety of sources to track county population trends.

ESRI also employs a time series of building permits and housing starts plus residential deliveries. Data sources are integrated and then analyzed by Census Block Groups.

Sources of data include:

- ▶ Supplementary Surveys of the Census Bureau
- ▶ Bureau of Labor Statistics' (BLS) Local Area Unemployment Statistics
- ▶ BLS Occupational Employment Statistics
- ▶ *InfoUSA*
- ▶ U.S. Bureau of the Census' Current Population Survey
- ▶ National Planning Association Data Service

Medfield Public Schools

Below is a list of definitions as they appear on the U.S. Census Bureau website, to aid in interpretation of the following tables and maps.

Household:

A household includes all the people who occupy a housing unit as their usual place of residence.

Average family size:

A measure obtained by dividing the number of members of families by the total number of families (or family householders).

Family household (Family):

A family includes a householder and one or more people living in the same household who are related to the householder by birth, marriage, or adoption. All people who are related to the householder are regarded as members of his or her family. A family household may contain people not related to the householder, but those people are not included as part of the householder's family in census tabulations. Thus, the number of family households is equal to the number of families, but family households may include more members than do families. A household can contain only one family for purposes of census tabulations. Not all households contain families since a household may comprise a group of unrelated people or one person living alone.

Householder:

The person, or one of the people, in whose name the home is owned, being bought, or rented. If there is no such person present, any household member 15 years old and over can serve as the householder for the purposes of the census. Two types of householders are distinguished: a family householder and a nonfamily householder. A family householder is a householder living with one or more people related to him or her by birth, marriage, or adoption. The householder and all people in the household related to him are family members. A nonfamily householder is a householder living alone or with nonrelatives only.

Medfield Public Schools

The following tables illustrate the current estimates and 5-year population projections based on block groups that comprise the state and school district, indicating areas of current and projected growth. The tables have been developed to determine selected age group projections and projections for household income, family size, and total households.

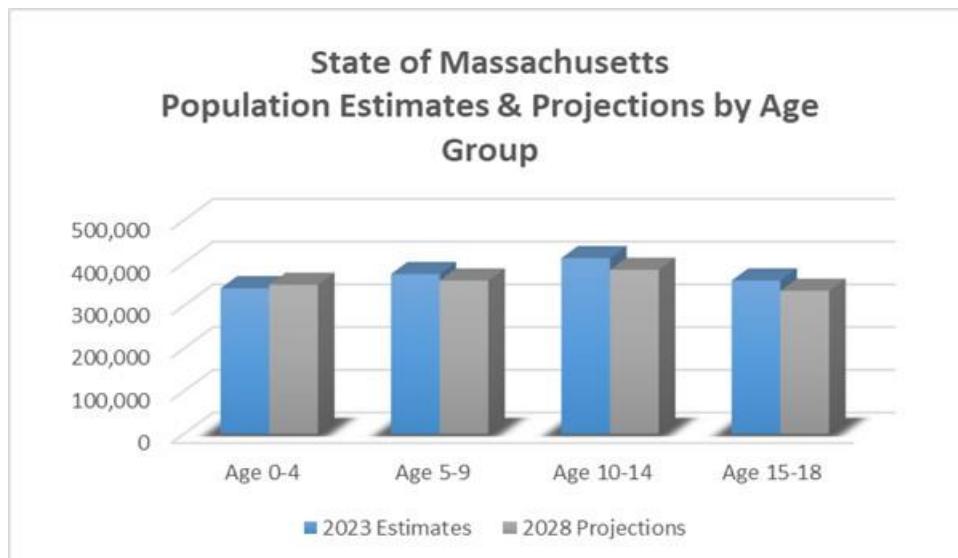

The total population in the State of Massachusetts is 7,121,186. This population is projected to increase by 53,912, or approximately 1% over a 5-year period.

The 0-18-year-old population in the State currently totals 1,484,805. This population is projected to decrease by 58,731 children, or 4 percent.

The median age is projected to increase by 2% from 40.8 to 41.5 years of age.

State of Massachusetts	2023 Estimates	2028 Projections	Change 2023-28	Change 2023-28 (%)
Total Population	7,121,186	7,175,098	53,912	0.8%
Age 0-4	340,677	348,892	8,215	2.4%
Age 5-9	373,925	358,708	-15,217	-4.1%
Age 10-14	411,217	383,732	-27,485	-6.7%
Age 15-18	358,986	334,742	-24,244	-6.8%
Total Age 0-18	1,484,805	1,426,074	-58,731	-4.0%
Median Age	40.8	41.5	0.7	1.7%

HOUSING INFORMATION

The table below illustrates the number of single-family and multi-family dwelling building permits issued each year in Medfield.

of Building Permits Issued in Medfield

Year	Single-Family	Multi-Family (5+ units)
2013	19	0
2014	22	92
2015	22	52
2016	12	10
2017	12	0
2018	33	0
2019	18	20
2020	12	56
2021	18	71
2022	18	0
2023	17	0

Source: SOCDS Building Permits Database; Town of Medfield

There is one major housing project under development in the Town – the Trinity project at the former Medfield State Hospital site. From the Town's website:

In 2014, the town of Medfield bought 128 acres of the old Medfield State Hospital property, and the purchase presented the community with both an opportunity and a challenge: What would be the best way to develop this property to benefit the community without detracting from Medfield's overall character? Over the past decade, the town has undertaken an extensive planning process, studying the property, engaging a diverse group of stakeholders, and launching a robust community outreach program to determine the property's future. When its efforts are complete, Medfield expects to have 334 new apartments (25% of which will be affordable), an arts and culture facility, and open space on the property, while preserving historic buildings and netting an estimated \$700,000 annually in additional tax revenue for the town.

Based on the national average of 21 students for every 100 multi-family units, the District could expect approximately 70 additional students from the Trinity project.

Medfield Public Schools

SURVIVAL RATIOS

The chart below demonstrates the changes in enrollment as students move through the system. Percentages greater than 100 indicate that there are more students than there were in the previous grade the previous year. In other words, there was growth and new students entered the system. Percentages less than 100 indicate that there was decline with students leaving the system.

- ▶ Birth to Kindergarten: This ratio indicates the number of children born in the area who attend kindergarten in the District 5 years later. Percentages less than 100% result from movement out of the district, attendance at a non-public or charter school, or residence in another district within the same area.

The following table illustrates the survival ratios for the Medfield Public Schools.

from	to	birth -> K	K->1	1->2	2->3	3->4	4->5	5->6	6->7	7->8	8->9	9->10	10->11	11->12

ENROLLMENT PROJECTION

Three sets of enrollment projections (moderate, low, and high) were developed after analyzing the data collected in this report. The moderate projections indicate an increase of 182 students in grades Pre-K through 12 from the 2023-24 to the 2033-34 school year. The following tables illustrate projected enrollments by grade and by grade group through the 2033-34 school year.

Medfield Public School District
Projected Enrollment - Moderate

Grade	2023-24 Actual	2024-25	2025-26	2026-27	2027-28	2028-29	2029-30	2030-31	2031-32	2032-33	2033-34

Medfield Public Schools

In addition to the moderate enrollment projection, following are the low and high enrollment projections. The following defines, in terms of economy and housing, the differences between the projections.

Low Projection

- Higher inflation/interest rates
- Decline in new housing starts and births

Moderate Projection

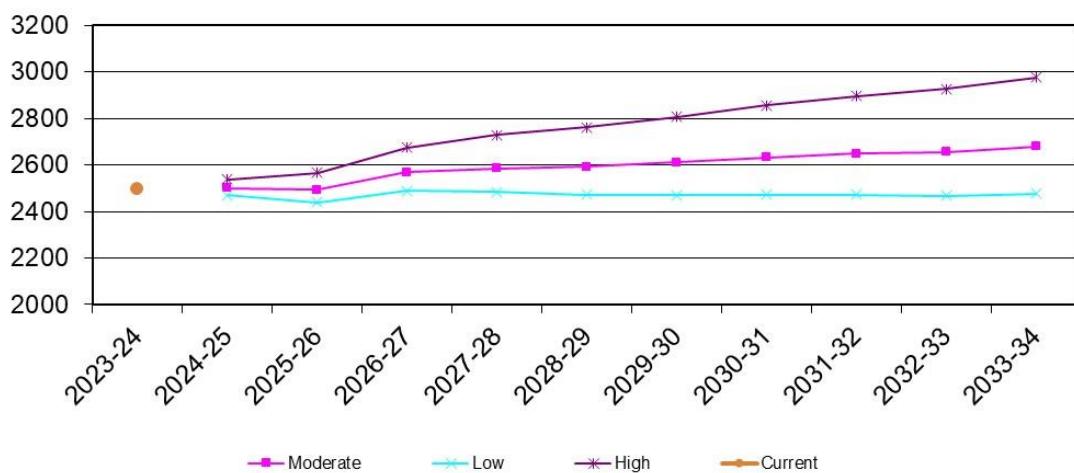

- Moderate inflation/interest rates
- Moderate level of new housing
- Births remain steady

High Projection

- Low inflation/interest rates
- Increase in new housing starts and births

The projections range from a low of 2,477 students to a high of 2,975 students in the 2033-34 school year.

Medfield Public Schools Projected Enrollment Comparison

Medfield Public Schools

The low projections indicate a decrease of 21 students in grades Pre-K through 12 from the 2023-24 to the 2033-34 school year.

Medfield Public Schools

CONCLUSION

As with any projection, the District should pay close attention to live birth counts, enrollment in elementary schools, and housing growth. Each of these factors will have an impact on future student enrollment.

FutureThink is pleased to have had the opportunity to provide the District with enrollment projection services. We hope this document will provide the necessary information to make informed decisions about the future of the Medfield Public Schools.

MSBC Follow Up from 3/6/24 Meeting

Mike Weber <weber_sbc@medfield.net>

Thu, Mar 14, 2024 at 1:51 PM

To: SBC Medfield <sbc@medfield.net>, SBCForwardGroup <SBCForwardGroup@medfield.net>, Jeff Marsden

<Jmarsden@email.medfield.net>, Kristine Trierweiler <ktrierweiler@medfield.net>, Brittney Franklin

<bfranklin@medfield.net>, Steve Grenham <sgrenham@email.medfield.net>

All,

Apologies for the lengthy email, a lot of what I'm writing is me getting my thoughts in order so that we can collectively concentrate on the appropriate next steps for our committee.

Finding a full/complete feasibility study from our last go-around isn't exactly perfect.

After reviewing everything we did last go-around and reviewing the MSBA processes, here's what I found.

MSBA Process (outlined here: https://www.massschoolbuildings.org/building/modules_overview) is:

Module 1- Eligibility Period

- Basically get accepted into the MSBA
- Form school building committee
- agree on design enrollment
- execution of feasibility agreement (<https://drive.google.com/file/d/1-XLyuuZISbxIRZltx4hArwaNJWYPFPzx/view>)

Module 2: Project Team

- hire an OPM
- Go through designer selection process and select architect (town doesn't exactly get the final choice here)

Module 3: Feasibility Study (I've attached MSBA's Feasibility Study Checklist to this email)

- Educational plan
- Initial Space Summary
- Document existing conditions
- Establish design parameters
- Develop and evaluate alternatives for designs
- Develop and PDP (preliminary design program)
- Develop a PSR (preferred Schematic Report)

Module 4: Schematic Design- Module 8: Project Closeout, etc., etc.

If we eliminate MSBA requirements, for now, and still follow their processes, there is much we can accomplish in the short term.

Module 1 - we have our committee and we are working on design enrollment.

Module 2- TBD

Module3- we should discuss what tasks we think we should be tackling and if we need consultants for assistance.

- We have a good educational plan that can be updated rather easily.
- Space summary is required to be done and our enrollment projection will help with this.
- Existing condition reports – we have this for various sites. Specifically for Dale St., we have good information.
- Develop and evaluate alternatives for designs.
- Develop PDP. PDP from last project found here: https://core-docs.s3.amazonaws.com/documents/asset/uploaded_file/625794/Draft_PDP_Submission_3-19-20-Rev_1.pdf
- Develop PSR . PSR from last project found here: https://core-docs.s3.amazonaws.com/documents/asset/uploaded_file/1068356/201223_

[PSR_Final_with_Appendices.pdf](#)

There's a lot of information in these documents. Since the PDP is done before the PSR, I think we should focus our energy on parts of this document. If you could all read pages 130-321 (it's a quicker read than you think) we'll all be better informed.

I'd like to get alignment on some of these key points above. In short, where are we today?

Next, we can decide on key decisions required in the PDP and tackle those. These include grade config, Site criteria/selection, possible building options presented prior.

Lastly, Steve Callahan's updated presentation was educating. Should we push this out to the community in written form?

I believe our next meeting agenda should be:

- Approval of meeting minutes
- Communications subcommittee update
- Future Think update
- Discussion of previous PDP and steps our committee can accomplish in the short term.

Please do not 'reply all' to this email. Comments or suggestions are encouraged and please send to Meredith and I only.

Thanks, Mike .
